

BRAIN QUEST INSTRUCTIONS

The EELISA Brain Quest is a dissemination material designed to open in a fan-like format. To ensure correct production and assembly, please follow the instructions below:

- The file includes a cut mark but does not include a cutting line for the rounded corners. It is important to request printing with a cutting line that includes the rounded corners. Your printing provider should be able to implement this without issue.
- Use the image "Brain Quest OK" as a reference for the placement of the screw. The screw must be positioned in the bottom-left corner of the tool.
- The screw is intended to have a diameter of 1 cm.
